small flower frame

(cross stitch)

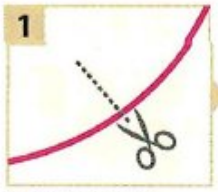

Kit contents	What you need to prepare	cross stitch counting	Estimated production time
● Cosmo No. 25 embroidery thread ● embroidery cloth ● embroidery needle ● wooden frame ● How to make instructions with pattern	● scissors ● Iron ● Sewing thread or cellophane tape ● embroidery hoop *You can stab more clearly if you use	14 count (2 counts)	Approximately 6 to 10 hours
		Finished size	
		Frame dimensions: approx. 11.6cm x 11.6cm	

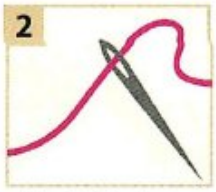

<please note) *This kit contains needles, please handle with care and keep out of reach of children.

*The color of the finished product in the photo may differ slightly from the actual product due to printing conditions.

1 prepare the thread

Cut a length of string approximately 50cm long.

Thread the needle with the thread.

What is Hondori?

The embroidery thread in this kit is the most popular type of embroidery thread, consisting of six thin strands loosely twisted together. The number of strands of this thin thread that you pull out and thread through the needle is called the "number of strands."

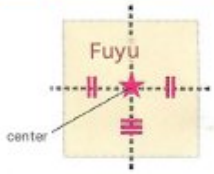

(In the case of two pieces) Hold the bundle of threads and pull out the two threads one by one, then align the two strands again before threading them through the needle hole.

Two pieces

2 do cross stitch

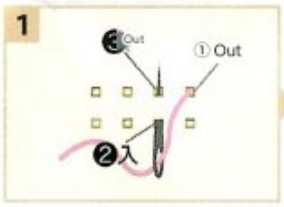

- Determine the center as shown in the left image, and then stitch outward.
- When cross-stitching, do not pull the thread too tightly, but leave a moderate amount of slack.
- To avoid making mistakes, it is a good idea to copy the design in black and white and colour in the squares you have finished stitching.

*Please see the back for instructions on how to set it in the frame.

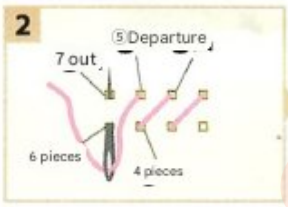

advice

There are other ways to proceed with cross-stitching and finish off threads besides the methods introduced here. There is no one correct way, so try them out and find the method that is easiest for you.

Cross stitch [How to move horizontally]

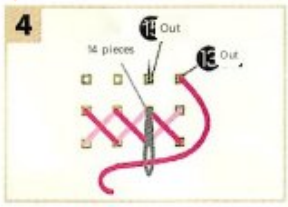

As shown in the diagram, the needle comes out from 1, enters from ③, and comes out from ❹.

Repeat step 1 to move horizontally.

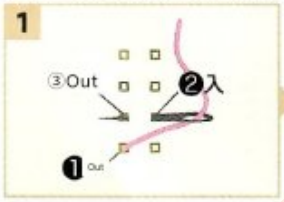

Cross the threads to return to the original position as shown in the diagram.

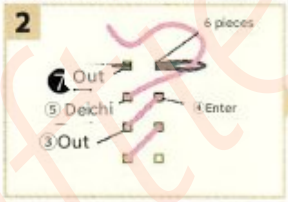

Continue stitching in the next row in the same way.

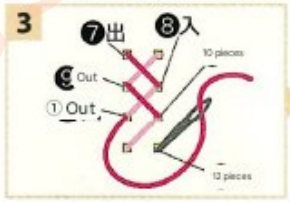

Cross stitch [How to work vertically]

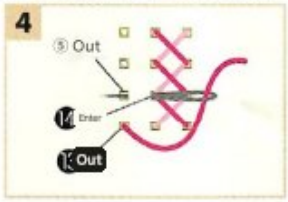

As shown in the diagram, the needle comes out from 1, enters into ③, and comes out from ❷.

Repeat step 1 to move vertically.

Cross the threads to return to the original position as shown in the diagram.

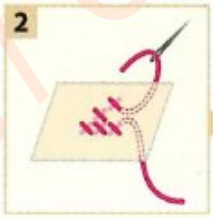

Continue stitching in the next row in the same way.

[Beginning and Ending] Cross Stitch

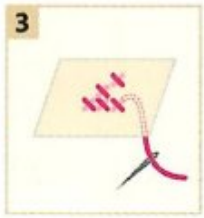

In cross-stitching, you do not tie a knot, but instead finish the thread as shown below.

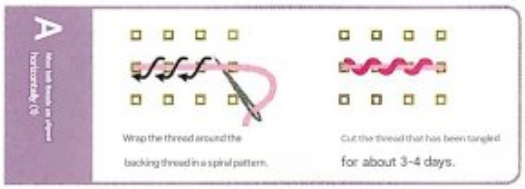

Bring the needle from the back of the starting point to the front.

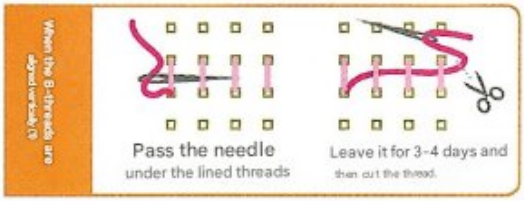

Continue stitching, and when you are done, finish the thread using one of the methods shown in the diagram on the right, A or B.

Thread the needle through the thread you started stitching with and finish the thread using one of the methods shown in the diagram on the right, A or B.

How to read cross stitch patterns

Each square of the design is 1 stitch x 1 stitch on the fabric. Do not transfer the design onto the fabric, but stitch while counting the squares on the fabric and design as shown in the illustration.

<Design (example)>

/Cross stitching based on the design/

/Which is higher?

The top thread can be either / or . However, within a single piece, make sure that the top and bottom threads cross in the same direction, as shown in the diagram.

(Top row) is up (Bottom row)/ is up

The thread that comes to the top

Be careful of twisted threads

As you continue stitching, the thread may become twisted and thinner, causing the fabric to show through. To keep the thread flowing beautifully and plumply, be sure to frequently reverse the twist.

good example

The thread is smooth and fluffy without twisting.

×Bad example

The threads are twisted and thin, and the fabric is visible.

The thread should be no longer than 2cm

When stitching at different points with the same thread, make sure that the thread that crosses over to the back is no more than 2 cm. If it is too long, the thickness of the thread will be visible on the front, which will affect the finish and may cause you to run out of thread.

The thread should

If it extends more than 2cm, stop there and dispose of it.

Small Flower Frame (Cross Stitch)

No.882 Kalanchoe

Kit contents

Before you begin, please make sure you have all the ingredients listed.

- ☐ Embroidery cloth (Javacloth 55/10. Off-white) ..... 1 piece
- ☐ embroidery needle ..... 1 piece
- ☐ wooden frame ..... 1 piece
- ☐ Instructions for making with pattern (main page) ..... 1 piece
- ☐ Cosmo No. 25 embroidery thread (cut to approximately 1m)

• Orange A (144A)	···1 book	• Orange D (188)	···2 pieces	• Green (633)	.....3 pieces
• Orange B (403)	···2 pieces	• Yellow (301)	.....1 piece	• Dark green (636)	...4 pieces
• Orange C (405)	···3 pieces	• Yellow-green (631)	···2 pieces		

*The numbers in parentheses are the color numbers of Cosmo No. 25 embroidery thread.

What you need to prepare

☐ scissors ☐ iron ☐ Sewing thread or cellophane tape

☐ embroidery hoop *You can stab more clearly if you use

material

☐ Embroidery thread, embroidery cloth: 100% cotton

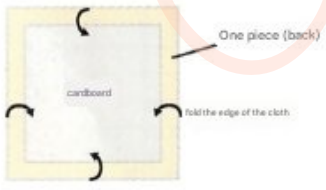

! please note

This kit contains needles, please handle with care and keep out of reach of children.

The amount of embroidery thread included in this kit is sufficient if you follow the stitching instructions exactly as shown in the pattern. Please read these instructions carefully first. If you use the wrong color or number of threads, or if you start by using too much thread, you may run out of thread. In this case, please check the color number and purchase from a store that sells Cosmo embroidery thread.

3 Place the artwork in the frame

1 Spread the work face down, taking care not to bend the grain.
Place the paper on top. If you are concerned about wrinkles, iron the backside at a low temperature beforehand.
Be careful not to crush the stitches.

2 Secure the fabric with sewing thread (Figure A) or cellophane tape (Figure B) to prevent it from sagging.

3 Place the back plate on top of 2, check the top and bottom of the frame, and then fit it in.

4 Fasten the frame fasteners and you're done.

(Figure A)

fasten with sewing thread

(Figure B)

Secure with cellophane tape
