Backstitch...Brown (3311) 3 strands

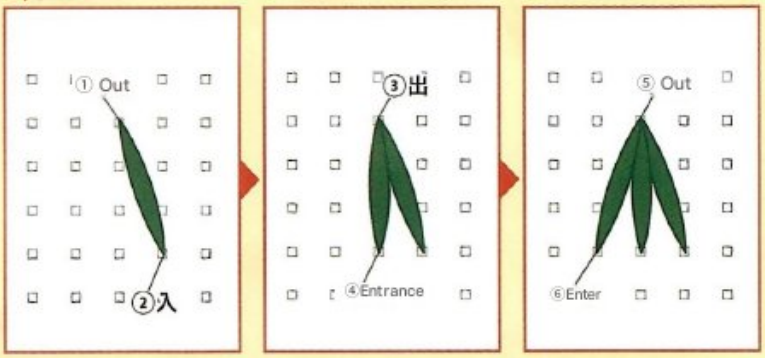

Cross Stitch/Back Stitch...Red (344) 3 pieces

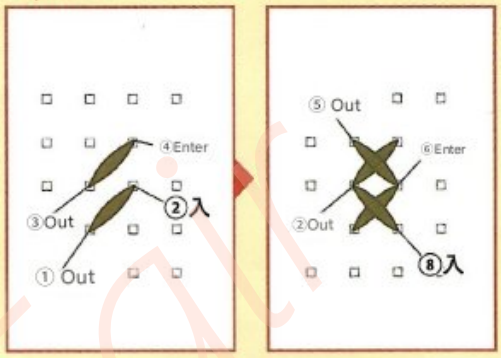

Straight stitch... ●Green (319) 5 Yellow-green (822) 6 Yellow (2702)

3 pieces

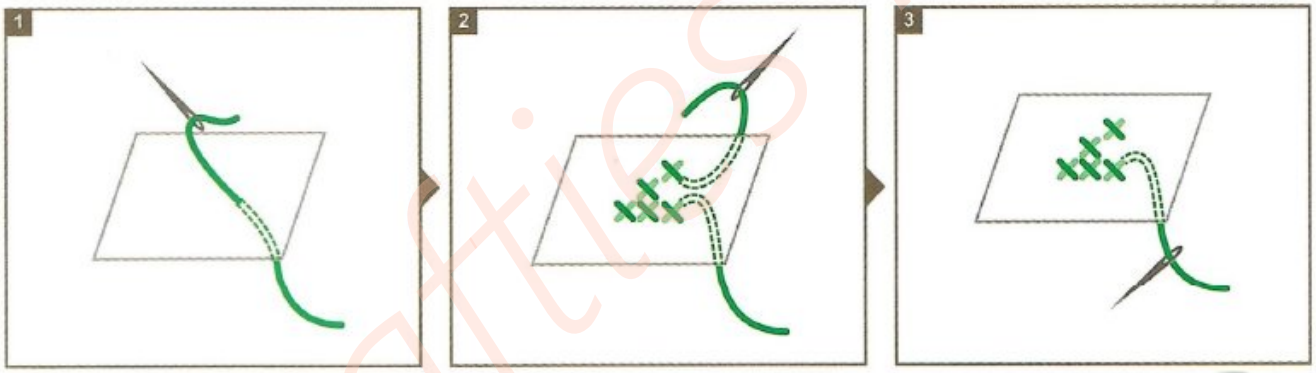

7 Cross stitch...Brown (3311)

2 pieces

[Beginning and end of stitching]

Do not tie a knot at the beginning or end of the stitching, but finish as follows.

Bring the needle from the back of the starting point to the front.

Continue stitching, and when you are done, finish the thread using one of the methods shown in the diagram below (A/B).

Thread the needle through the thread at the beginning of the stitching and finish the thread using one of the methods A and B shown in the diagram below.

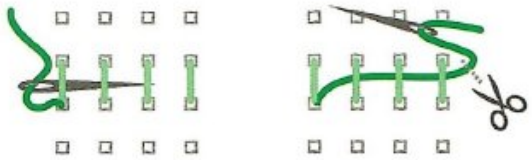

A

Wrap the thread around the backing thread in a spiral pattern.

Cut the thread that has been tangled for about 3 to 4 days.

B

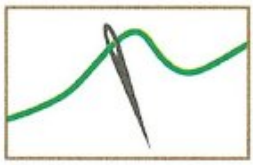

Pass the needle under the lined threads.

Leave it for 3 to 4 days and then cut the thread.

When stitching continuously with the same thread, make sure that the thread does not extend beyond 2cm across the back.

Crafties Fair

1 Prepare the thread

Thread the needle with the color you want to use.

What is Hondori?

The No. 25 embroidery thread included in this kit is the most popular embroidery thread, consisting of six thin strands loosely twisted together.
The number of strands of this thin thread you pull out and thread through the needle is called the "number of strands."

(In the case of three pieces)

Hold the bundle of threads and pull out the thin threads one by one, align the three strands again, then thread them through the needle hole.

2 Embroidery

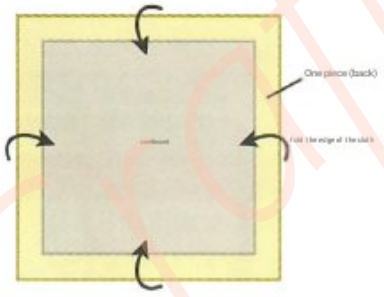

1 Before embroidering, sew the edges of the fabric with sewing thread to prevent them from fraying.

2 Determine the center as shown in the left image, and then stitch outward.
*See "Embroidery pattern", "How to stitch", and "Starting and finishing stitches" on the back.

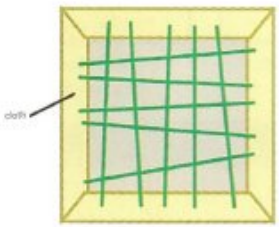

3 Tailor

1. Lay the piece face down and place the cardboard on top to prevent the grain from bending. If you are concerned about wrinkles, iron the backside at a low temperature beforehand. Be careful not to crush the embroidery stitches.

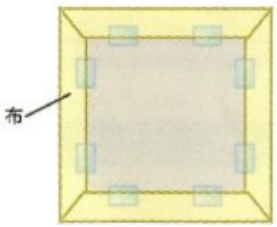

2 Secure the fabric with sewing thread (figure A) or cellophane tape (figure B) to prevent it from sagging.

<Figure A>

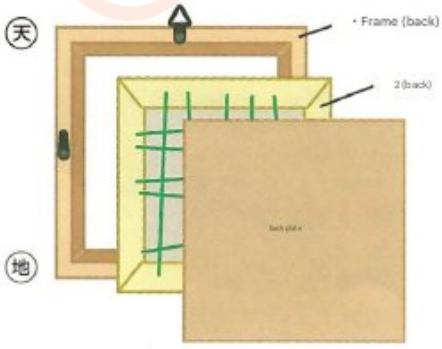

fasten with sewing thread

〈図B〉

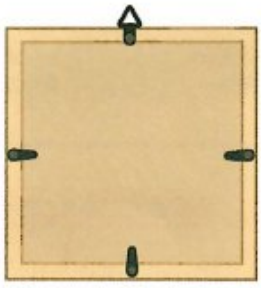

Secure with cellophane tape

3 Place the back plate on top of 2, check the top and bottom of the frame, and then fit it in.

4 Fasten the frame fasteners and you're done.

Kit contents

*Please make sure you have all the ingredients listed before you start.

- Embroidered cloth (Javacloth 65/99. Natural) 1 piece
- embroidery needle 1 piece
- wooden frame 1 piece
- Instructions for making with pattern (main page) 1 piece

- Cosmo No. 25 embroidery thread (cut to approximately 1m)
  - Green (319) 2 pcs
  - 1 pc Blue (165A)
  - Yellow-green (822) 1 bottle
  - Red(344) 1 piece
  - Yellow (2702) 2 bottles
  - Brown (3311) 1 bottle

*The numbers in parentheses are the color numbers of the Cosmo embroidery thread.

please note

This kit contains needles, please handle with care and keep out of reach of children.

The amount of embroidery thread included in this kit is sufficient if you follow the stitching instructions exactly as shown in the pattern. Please read these instructions carefully first. If you use the wrong color or number of threads, or if you start by using too much thread, you may run out of thread. In this case, please check the color number and purchase from a store that sells Cosmo embroidery thread.

Jiza
Ji-zashi®
jizashi

"Jizashi®" is a technique that involves freely combining one or several types of stitches while counting the threads of the fabric. It was invented by Kiku Totsuka, the founder of Totsuka Embroidery, and is still popular today. Western embroidery, which was still rare in the early Showa period, was beautiful and gorgeous, and was the envy of women of the time. By adding her own unique twist to this embroidery, she has created even more free and diverse expressions. This kit is made up of stitches that are easy to embroider, even for beginners, and by following the instructions, you can enjoy the same finish as the sample.
