cross stitch

The fabric is woven at roughly equal intervals both vertically and horizontally, making it suitable for embroidery where the stitches need to be counted.

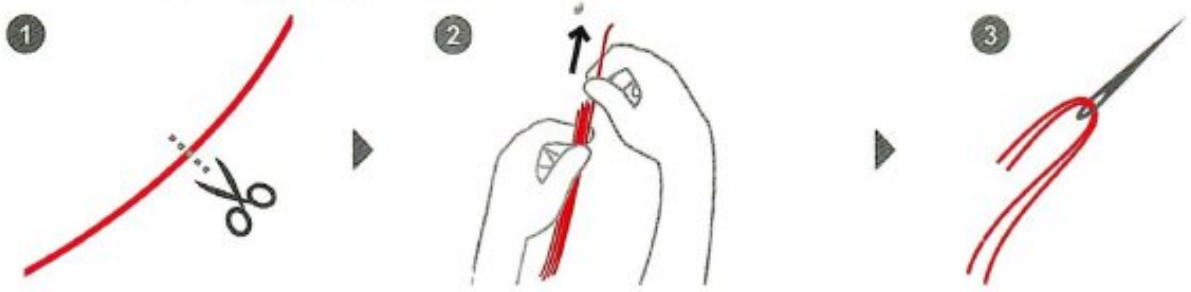

The inside page introduces "How to do cross stitch"

With cross stitch pattern

What is "hondori"? It uses a rounded needle such as a "cross stitch needle."

The most popular embroidery thread is No. 25 embroidery thread, which is made up of six thin strands loosely twisted together. The number of strands of this thin thread pulled out and threaded through the needle is called the "number of strands."

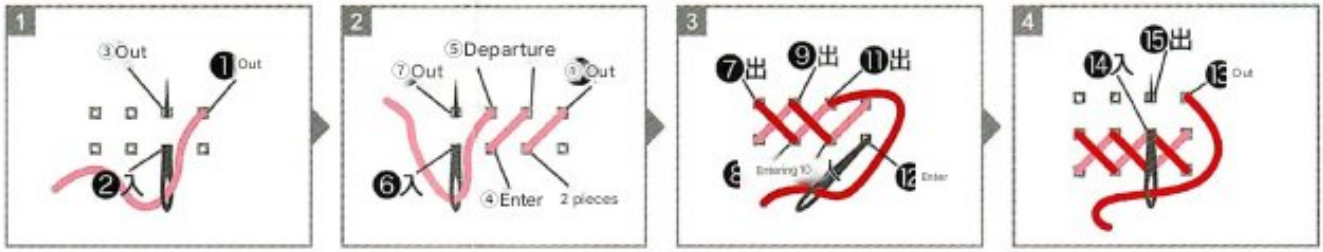

Cut a length of string approximately 50cm long.

Hold the bundle of threads and pull out the thin threads one by one, align them, and then thread them through the needle eye.

The above is a diagram of two

how to cross stitch

How to move horizontally 法

As shown in the figure, exit from ● and enter ②.

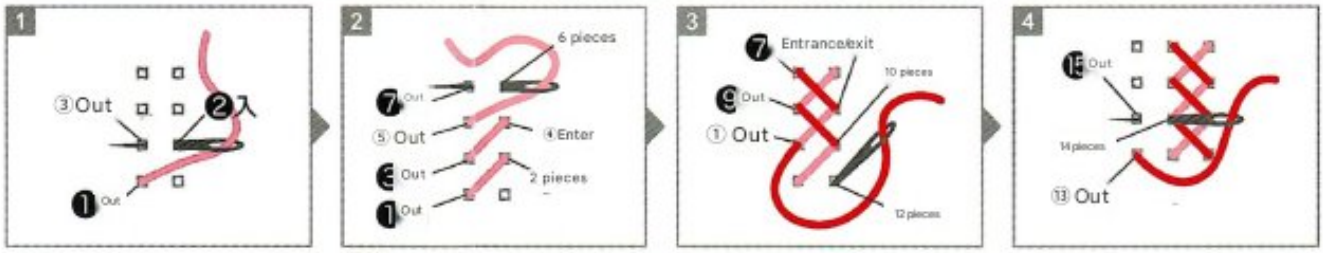

Take out the needle from the

1 Repeat this to move horizontally.

Cross the threads to return to the original position as shown in the diagram.

Continue stitching in the next row in the same way.

How to go vertically

As shown in the figure, exit from ● and enter ●.

Take out the needle from the

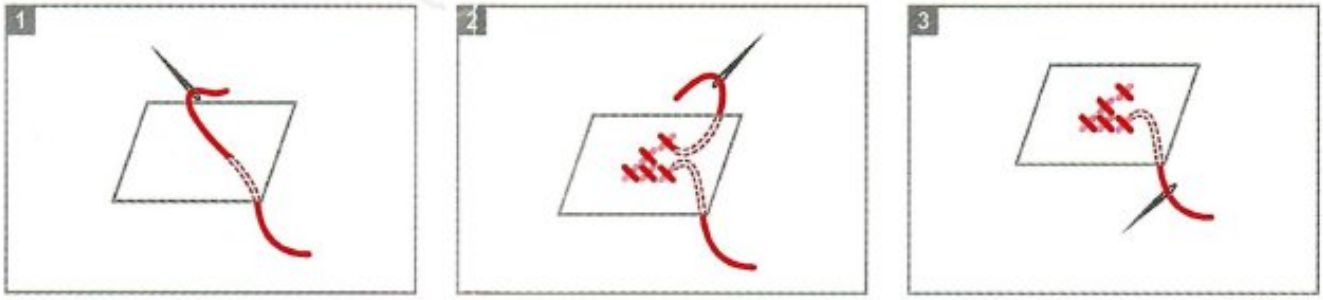

1 Repeat this to move vertically.

Cross the threads to return to the original position as shown in the diagram.

Continue stitching in the next row in the same way.

The beginning and end of the stab

Tie a knot at the beginning and end, or finish as shown below.

Bring the needle from the back of the starting point to the front.

Continue stitching, and when you are done, finish the thread using one of the methods shown in the diagram below, A or B.

Thread the needle through the thread you started stitching with and finish the end of the thread using one of the methods shown below.
