[Sashiko dishcloths]

<Introduction>

Please check that all the kit materials are included.

- The design printed on the fabric will disappear when washed.

The heat of the iron may cause the markings to disappear, so please remove them before you finish stitching.

Please refrain from using an iron.

<How to handle thread>

- Remove the label and unfold the skein.

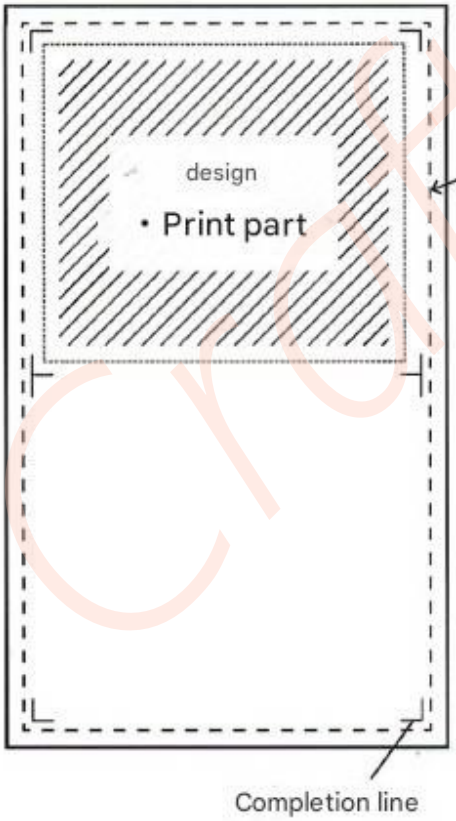

-Tie the two ends together with a different thread or something similar, then cut one of the loops.

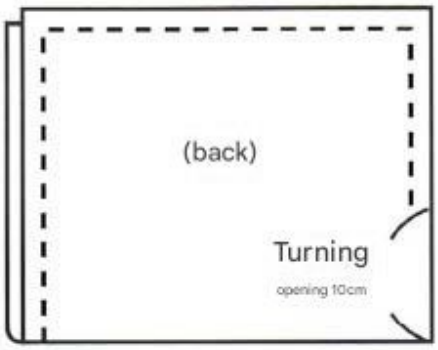

- Remove one wire from the other ring and use it.

<How to make>

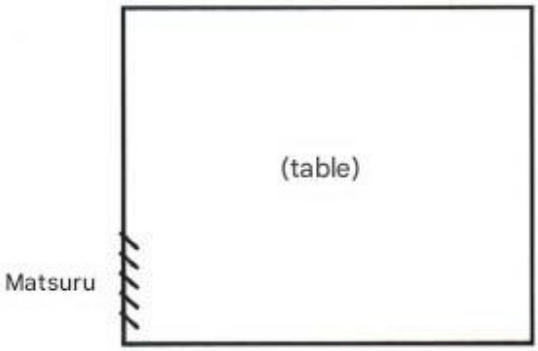

①---Cut the fabric along the line.

②With the front sides facing each other, sew 0.8cm inside, lining up with the finished line, leaving an opening for turning.

③ Turn it over from the opening to the right side and sew the opening shut.

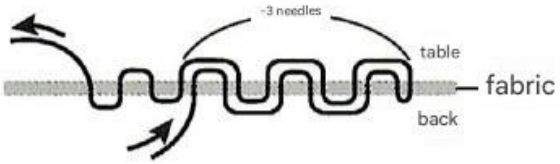

Crafting Fair

<How to stitch thread>

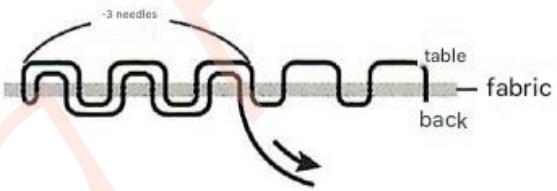

-Start stabbing-

Insert the needle three stitches past the beginning of the stitch, then go back three stitches with a small needle, then place the needle over that and continue stitching.

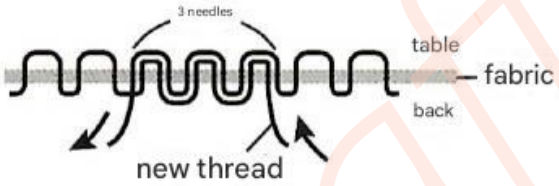

- End of stabbing -

Bring the needle to the back and go back three stitches using a small stitch so that it does not show on the front.
Cut the end of the thread, leaving about 0.2 cm.

-How to connect the threads-

At the end of the stitch, overlap three stitches so that it does not show on the outside.

Stitch around the outer frame, then proceed to stitch each pattern along the design. If you want to stitch the next pattern without cutting the thread, insert the needle between the outer and lining fabrics and pass the thread through. Stitch while squeezing the thread to prevent the seams from coming together.

<How to finish>

After you finish embroidering, wash the item by hand with water to remove the printed design. To avoid crushing the stitches, place a towel on the ironing board and iron the item from the back.
