How to stitch cross stitch

*Stitch while aligning the top and bottom of the thread crossings in a certain direction.

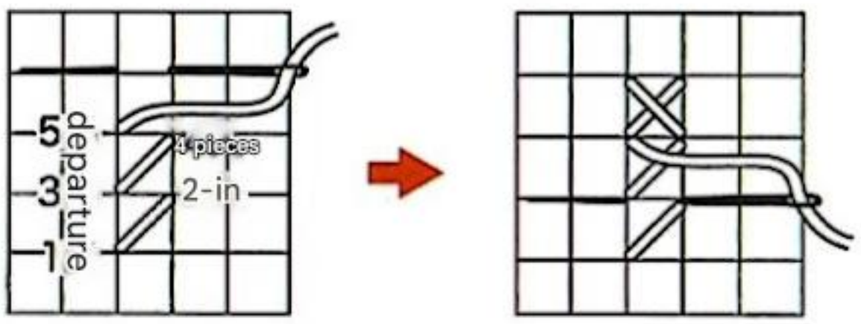

*Be careful not to pull the thread too tightly, and leave some slack when stitching. Choose the method in the diagram that is easiest for you.

Moving one stitch at a time horizontally

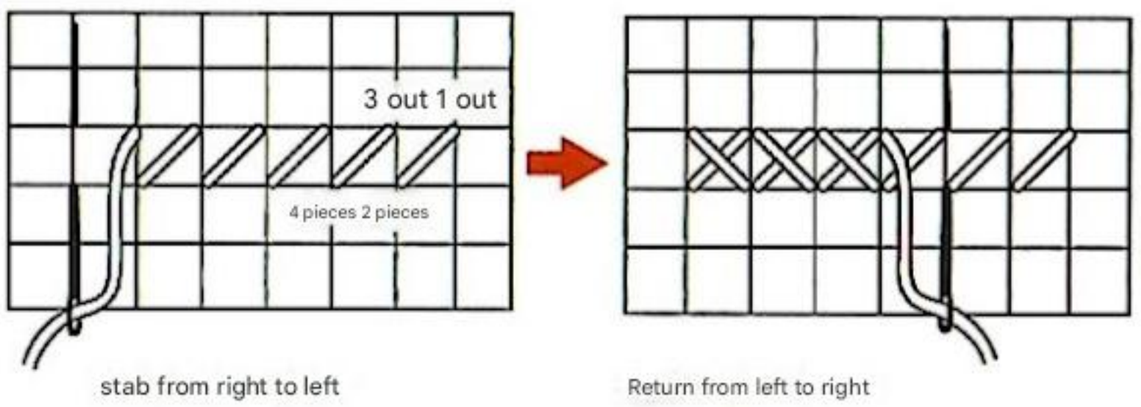

How to move multiple stitches vertically

Pierce from bottom to top

Return from top to bottom

How to move multiple steps sideways

stab from right to left

Return from left to right

Basics of punched canvas

*When embroidering on a punched canvas, use a pointed "French embroidery needle."

*For a neat finish, insert the needle straight into the center of the canvas squares.

*After embroidering, loosen the canvas a little to make it easier to remove.

*If you want to make one stitch larger, you can sandwich two rows of canvas and use them as one stitch.
